**Meet Mr. Vieau**

As a child growing up in Delano, I was able to appreciate the small town atmosphere of neighborhood ball games and pick-up games of all sorts. The charm of Delano goes back several decades and the appeal has spread throughout this area as this community is sought by many as a great place to raise children.

I earned my undergraduate degree of a Bachelor of Science degree with a Major in Mathematics, a minor in Computer Science, and a teaching license in 1987. I began my teaching career at Dawson-Boyd; a small district in western Minnesota. While there, I taught mathematics to students in grades eight through 12. In addition to teaching math to the high school students, I was heavily involved in coaching. These coaching duties included Assistant Boys Basketball, Assistant Volleyball, and Assistant Baseball.

After eleven years at Dawson-Boyd, I taught math for one year at Watertown-Mayer before moving to teach high school math here at Delano High School in the 1999-2000 school year.  During my teaching tenure at DHS I was fortunate to be able to teach courses from Geometry I through Calculus I and II as a CIS course. I was in the classroom at Delano High School for four years. While teaching math at Delano, I earned my Master of Arts in Education degree from St. Mary's University of Minnesota.

As an administrator, I began working in the high school office in the fall of 2003. While beginning work in the office, I completed my administrative license from St. Cloud University in 2005. Since then, I have been working in the capacity of the Assistant Principal. In 2013, I had the distinct privilege of representing Minnesota as the Assistant Principal of the Year.

While working with the students of Delano High School over the past 14 years, I have come to realize that our students are some of the best people you will ever find. Overall our students have great heart, great compassion and they are the kind of people you would want as your neighbors.
